

SYSTEM FEATURES

Want to learn more about eClinicalOS (eCOS) but don't have a lot of time right now? No worries. That's one of the great things about the system: One glance tells you everything you need to know.

One system. One database. One platform. All in one place.

Does keeping track of study data sometimes feel like you're trying to juggle knives? You're not alone. Using multiple systems that don't always play nice with one another can cost you time, money and sanity at work.

We think differently. eCOS from Merge eClinical is built on the idea of a common operating platform that ties together every aspect of study and data management. With eCOS, sponsors, CROs, clinicians, site managers and even patients have a full suite of integrated tools and services to access anytime, anywhere and from any device, including:

STUDY STARTUP

- Add Studies on Demand
- Study Design Wizard
- In-System Clinical Configurator™
- Multi-Study Access
- Electronic Signatures

REUSE FEATURES

- Import Full Study
- Import Study Process
