

Smart research starts here.

eClinicalOS[™]
Where smart research goes to work.[™]

A close-up photograph of a laboratory setting. In the foreground, a glass dropper is suspended, with a single drop of yellow liquid about to fall. The background is filled with several glass beakers and test tubes, some containing yellow liquids, all slightly out of focus. The overall lighting is bright and clinical.

There are phones, and then there are smart phones.
There are cars, and then there are smart cars.
There's research, and now there's smart research.

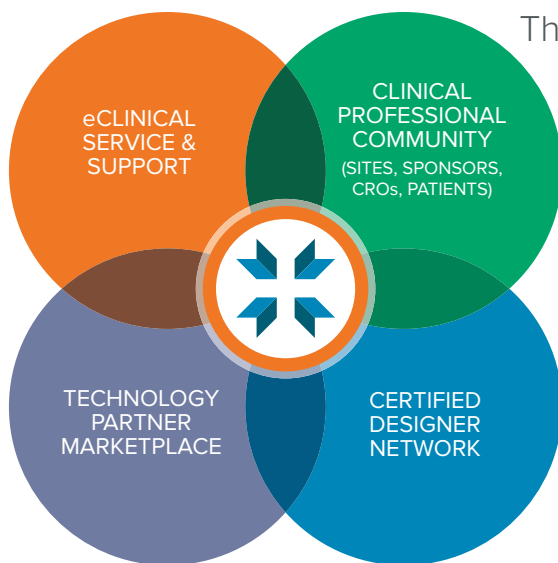

That's where we come in. **Welcome to eClinicalOS.**

A Smarter Idea

It's simply amazing what simple can do.

eClinicalOS (eCOS) from Merge eClinical is a revolutionary approach to managing clinical research: It's one platform that lets you design and manage studies with more control, convenience and confidence than ever before.

That's why more than 50,000 researchers at pharma and medical device companies, CROs (big and small, regional and global) and AROs have chosen eCOS as their go-to study management solution.

STRENGTH IN NUMBERS

When you put eCOS to work, you instantly become part of a family of professional peers who, like you, are committed to conducting research smarter. Through eCOS' industry-leading Service and Support, our Certified Designer Network and our Partner Marketplace, you capitalize on not only the expertise found within our walls, but also from technologists, translators, strategic planners and finance leaders in the industry.

MORE THAN
50,000

CLINICAL PROFESSIONALS
HAVE CHOSEN eCOS.

A Smarter Tool

We like to think of eCOS as the tool of choice for research professionals when studies are overwhelming, requirements are daunting and reliability is crucial.

It's a [highly scalable system](#) that offers all of the support capabilities you need no matter the size of your study or organization. Working from a single, secure platform, you simply flip on the features that help you manage your work smarter — from building your study and managing randomization to endpoint adjudication and archiving results. eCOS sets the industry standard for a simple, straightforward user experience.

eCOS is flexible, so you can configure it precisely to your workflow. It's easy to learn, easy to use and can be up and running in [days, not months](#). Best of all, you don't have to be a programmer to make the most of it.

When you're ready to get your study up and running, you decide how you want to move forward. You can build it yourself, we can build it together or you can have us build it for you. The choice is yours.

eCOS puts the power right where it belongs — squarely in your hands.

eCOS IS BEING USED IN MORE

THAN 82

COUNTRIES AND IS
AVAILABLE IN ANY

LANGUAGE

A Smarter System

With eCOS, you have the freedom to configure a solution that meets your team's evolving needs:

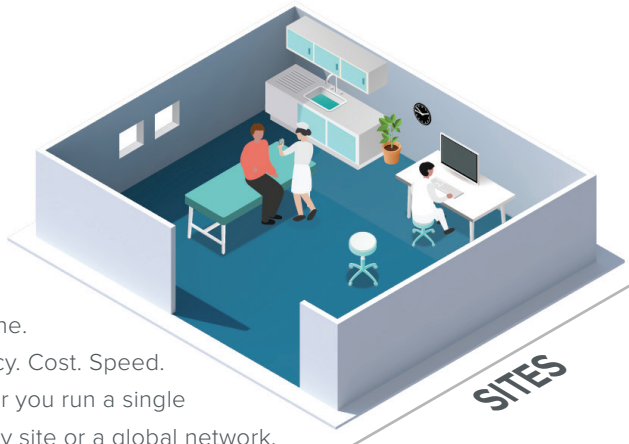

- **Choose what you want:** Use our Clinical Configurator™ to build your study, selecting only those features and services that fit your needs. eCOS grows as you grow.
- **Pay as you go:** Maximize savings as you only pay for the features you use when you use them, with no long-term contracts.
- **Eliminate upfront capital costs:** Avoid extensive (read: expensive) technology investments through our secure cloud-based platform.
- **Skip lengthy training:** Get in, get the know-how and get going — all within two weeks.
- **Get ready access:** Login to a single, secure URL from anywhere using any browser or mobile device running iOS, and your complete data set is right at your fingertips.
- **Learn only one interface:** Use one part of eCOS, and you're ready to master all the rest.

Make All the Smart Connections

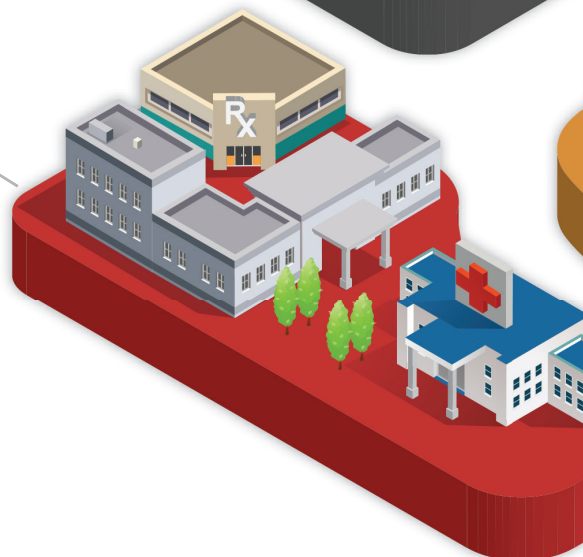

In clinical research, the truly connected world isn't just a brave new world — it's the only new world. Which is why you'll find eCOS at work pretty much everywhere. Because there's only one unified platform with the power to give all researchers better study design, more efficient data capture, and smarter data management.

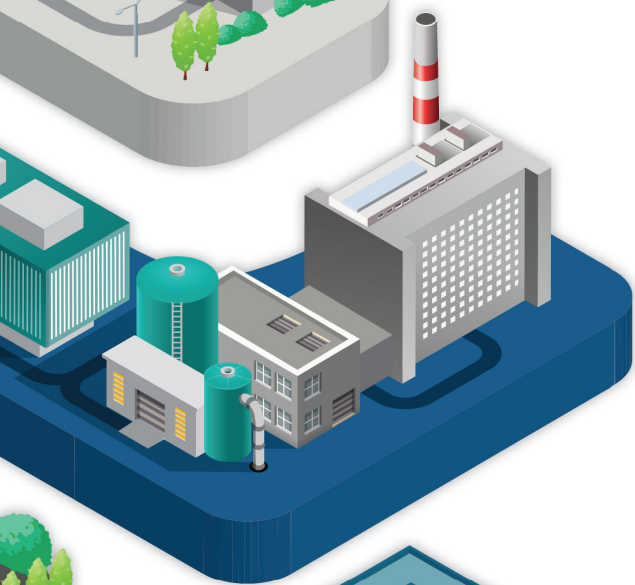

When you get right down to it, a seamless connection with patients is the proverbial “last mile” in clinical research. eCOS helps smooth the way through electronic patient-reported outcomes (ePRO) that help you make better decisions — decisions based on intelligence gleaned from immediate access to a more accurate and complete data set.

Discipline.
Accuracy. Cost. Speed.
Whether you run a single specialty site or a global network, the same factors make or break your reputation. Fortunately, eCOS helps you shine at the ordinary tasks that define extraordinary site management — no matter your workload (or over-workload, as the case may be).

CRO

It's no wonder CROs of every size trust eCOS with their studies. It gets them up and running in days. Delivers entirely new efficiencies. And gives them the edge they need to generate the best kind of business from sponsors — the profitable kind that comes back time and again.

SPONSORS

Small pharma, biotech and device companies find big-time productivity gains and cost-savings with eCOS. And bigger companies quickly find the advantages of eCOS over their existing study management software are no small matter.

ARO

When your work must withstand the scrutiny of a demanding academic and scientific community, no step in your research process can be a misstep. From study design to randomization to adjudication (and all points in between), eCOS gives your ARO every confidence it needs to demonstrate peer leadership, reinforce credibility and protect your integrity.

eCOS IS HARD AT
WORK AT OVER
15,000
SITES AROUND THE GLOBE.

Smarter Approach

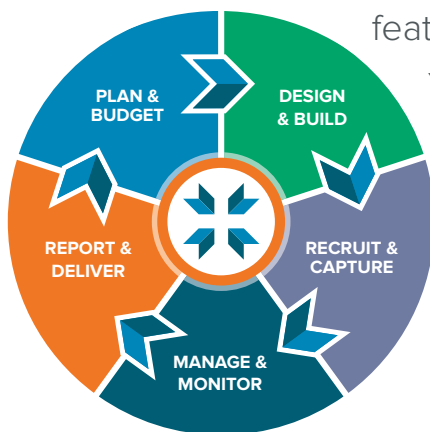

eCOS gives you more of what you want. And less of what you don't need.

Take our help desk, for example. You can call or chat online with the eCOS Support Center that's staffed 24/7/365. Expert eCOS-certified designers are available to help with study design, real-time troubleshooting or just about any question or need you may have.

Clients in every therapeutic area and research setting look to us as a trusted partner. And as more research is conducted globally, you'll find eCOS travels well: It's already at work in more than 82 countries and features on-the-fly translation of nearly 80 languages built right into the platform, an industry first.

And you can trust that eCOS will stay up to speed, no matter how fast you're moving. In addition to publishing regular updates to our core electronic data capture and management features, we offer a suite of built-in specialty functions.

You can tap those functions directly within the platform through the eCOS Marketplace, our hand-picked group of platform partners.

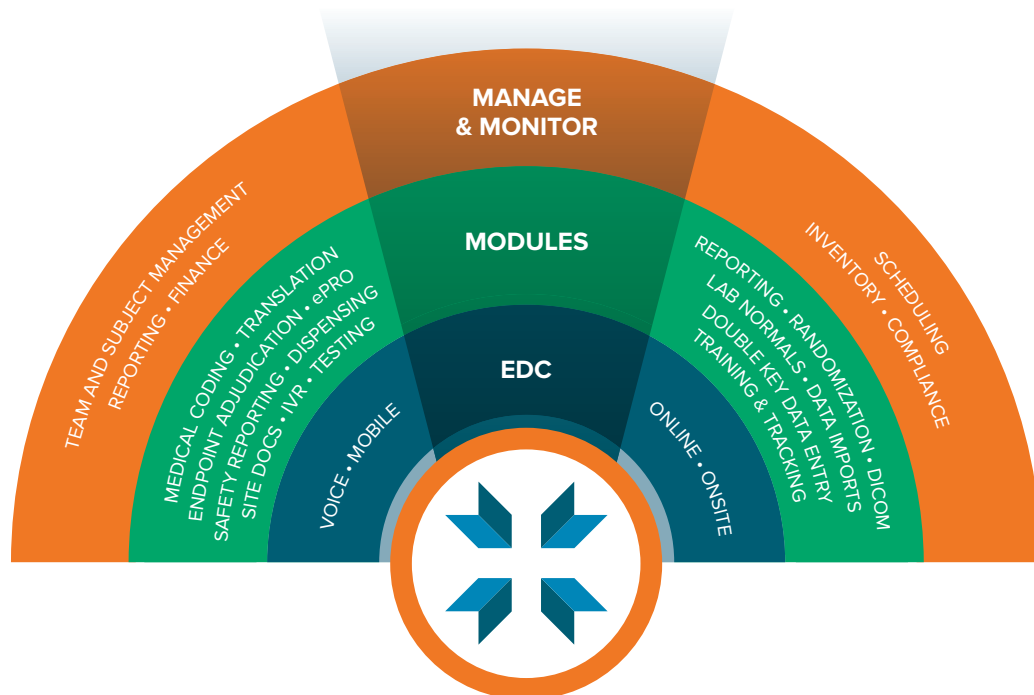

SUCCESS COMES FULL CIRCLE

From kickoff to final debriefing, eCOS has you covered every step of the way. Use our Clinical Configurator™ to design and budget your study within minutes instead of weeks. You simply tick off the functions you want, and press play to start your build. You'll find tackling every day-to-day tasks such as recruiting, data capture, monitoring, reporting, adjudicating and more are suddenly easier than ever before.

eCOS HAS MANAGED MORE THAN
2 MILLION
SUBJECTS

BUILT RIGHT FROM THE INSIDE OUT

Strengthening and streamlining electronic data capture (EDC) is at the very heart of eCOS. Yet thanks to more than a dozen powerful add-on options — from randomization and safety reporting to translation and endpoint adjudication — along with top-shelf study management and monitoring functions, you'll quickly realize value well beyond our core EDC.

A smarter way to get started

When everybody is telling you their software is the easiest, fastest and most efficient solution out there, how do you decide which one to pick? Easy. **Test drive 'em.**

That's why eCOS offers what we call the [Sandbox](#). Within minutes, you'll have access to every capability and service we offer so you can experience first-hand what it's like to use our system in a real-world environment.
